

**DEGLYCOSYLATED KRINGLE 1-3 REGION
FRAGMENTS OF PLASMINOGEN AND
METHODS OF USE**

5

Abstract of the Invention

10 Disclosed are deglycosylated fragments of a kringle 1-3
region of plasminogen, nucleotides encoding deglycosylated
kringle 1-3 region proteins and antibodies specific for
deglycosylated kringle 1-3 region proteins. The compositions
of the present invention have increased antiangiogenic activity
as compared to previously isolated kringle 1-3 region proteins.
Also included in the present invention are methods of treating
angiogenesis-associated diseases and conditions such as cancer
15 using the compositions described herein.
